

Do You Know if Your Team is Billing for Every Single Individual Service Performed?

The Complexity of Ever-Changing Billing Rules Limits Revenue Capture

Fact – charge capture is so complex, it is virtually impossible for people to identify all potential charge capture opportunities. Charge capture is too complex for even multi-purpose technology platforms to identify 100% of all billable events. Even when armed with a “best in class” technology platform, hospital teams almost universally lack the bandwidth & specialized charge coding auditing expertise to ensure you bill for 100% of services provided. The result – our audits typically find a 20% to 40% miss charge capture billing error rate.

Don't Miss Another Billable Service – Let Ni2 Capture Your 1% or More in Missed Net Revenues

We have a laser focus on maximizing charge capture net revenues. Actual delivered client results consistently increase net revenues by 1% or more.

- + Features industry leading proprietary technology platform with 12 year track record of success
- + Includes over 500,000 algorithms to identify all possible missed billable services, before the bill goes out the door
- + Leverages Ni2's experienced charge auditor team to remotely review virtual bills & medical records before claim is submitted
- + Ensures billing compliance while billing for all services you are legally permitted to bill

No Bandwidth Required

Ni2 provides a fully turnkey service, including the technology platform, all of the charge auditor resources required and detailed management reports which track the exact net benefit delivered. Ni2 also requires virtually no IT bandwidth, as our team handles the data pulls & system interfaces.

Assessment – No Budget Required

We take all the financial risk out of getting started. Our Charge Capture Optimization Assessment is included within our broader Operating Margin Assessment. No budget is required as our assessments fund themselves. We guarantee all assessment clients will receive at least a 2:1 immediate benefit. Overall, our assessments typically identify a performance upside of 20 – 60 times our fee.

We WILL Help Your Bottom Line

In just 75 days, we will identify your Charge Capture Optimization upside & provide a detailed roadmap for implementation. Once engaged, we will provide a fully turnkey service, including the technology platform, expertise & all needed charge auditor bandwidth to ensure execution success.
